INTRODUCTION –

Welcome to the future of sub-broker trading with TradeAI, where efficiency meets innovation in the dynamic world of the stock market. TradeAI is not just an application; it's a powerful tool meticulously designed to empower sub-brokers managing multiple clients with seamless trading solutions.

TradeAI streamlines the trading process for sub-brokers by offering a comprehensive platform that facilitates buying and selling of equity and derivatives for numerous clients simultaneously. Gone are the days of navigating multiple interfaces and executing trades one by one. With TradeAI, sub-brokers can execute equity and derivative trades for multiple clients with just one click, saving time and effort while maximizing productivity.

One of the standout features of TradeAI is its ability to execute future and options trades effortlessly for multiple clients. Whether it's standard quantities or custom allocations, TradeAI provides the flexibility to cater to diverse client needs, ensuring smooth and efficient trading experiences every time.

But that's not all. TradeAI goes beyond basic functionalities to offer advanced features such as basket orders and indicator trading. With basket orders, sub-brokers can execute multiple trades simultaneously based on predefined criteria, streamlining complex trading strategies with ease. Additionally, TradeAI empowers sub-brokers with indicator trading capabilities, allowing them to leverage technical indicators to make informed trading decisions swiftly.

At TradeAI, we understand the challenges faced by sub-brokers in today's fast-paced market environment. That's why we're committed to delivering a robust and intuitive platform that not only meets but exceeds the expectations of our users. With TradeAI, sub-brokers can stay ahead of the curve, capitalize on opportunities, and navigate the complexities of the stock market with confidence.

Experience the future of sub-broker trading with TradeAI. Join us as we revolutionize the way you trade, one click at a time.

REGISTRATION –

Here are the steps specifically for the registration process based on the provided fields:

1. **Access the Registration Page:** Users navigate to the registration page by clicking on the "Sign Up" button displayed on the TradeAI application's homepage.

2. **Enter Personal Information:**

First Name: Users enter their first name into the designated text field.

Last Name: Users input their last name into the provided text field.

Email: Users enter their email address, which will serve as their unique identifier for logging into the TradeAI application.

Phone Number: Users input their phone number, ensuring it is valid and formatted correctly.

3. **Create a Password:**

Password: Users create a secure password by entering it into the designated text field. The password should meet specific criteria for security, such as containing a mix of uppercase and lowercase letters, numbers, and special characters.

Confirm Password: Users re-enter the password to confirm it and ensure accuracy.

4. **Submit Registration:** After completing all required fields, users click on the "Sign Up" button to submit their registration information.

By following these steps, users can complete the registration process for the TradeAI application.

LOGIN –

1. **Access the Login Page:** Users navigate to the login page by clicking on the "Login" button.
2. **Email:** Users enter their registered email address into the designated text field.
3. **Password:** Users input their password into the provided password field.
4. **Submit Login Information:** After entering their email address and password, users click on the "Login" or "Sign In" button to submit their login credentials.

The image shows a login form for TradeAi1. At the top, there are two buttons: "Login" (highlighted in blue) and "Signup". Below these is the text "Welcome to TradeAi1" and the TradeAi1 logo, which includes a running figure icon and the text "TRADEAi1" with the tagline "FAST | SIMPLE | SECURE" below it. The form contains two input fields: "Email" with an envelope icon and "Password" with a lock icon and a toggle eye icon. Below the password field is a checkbox labeled "Remember Me" and a link "Forgot password". A blue "Login" button is located at the bottom right of the form.

TradeAI Dashboard –

The TradeAI dashboard provides you with a comprehensive overview of your trading activities, account information, and market updates. This user manual will guide you through the various features available on the dashboard.

1. Broker Health

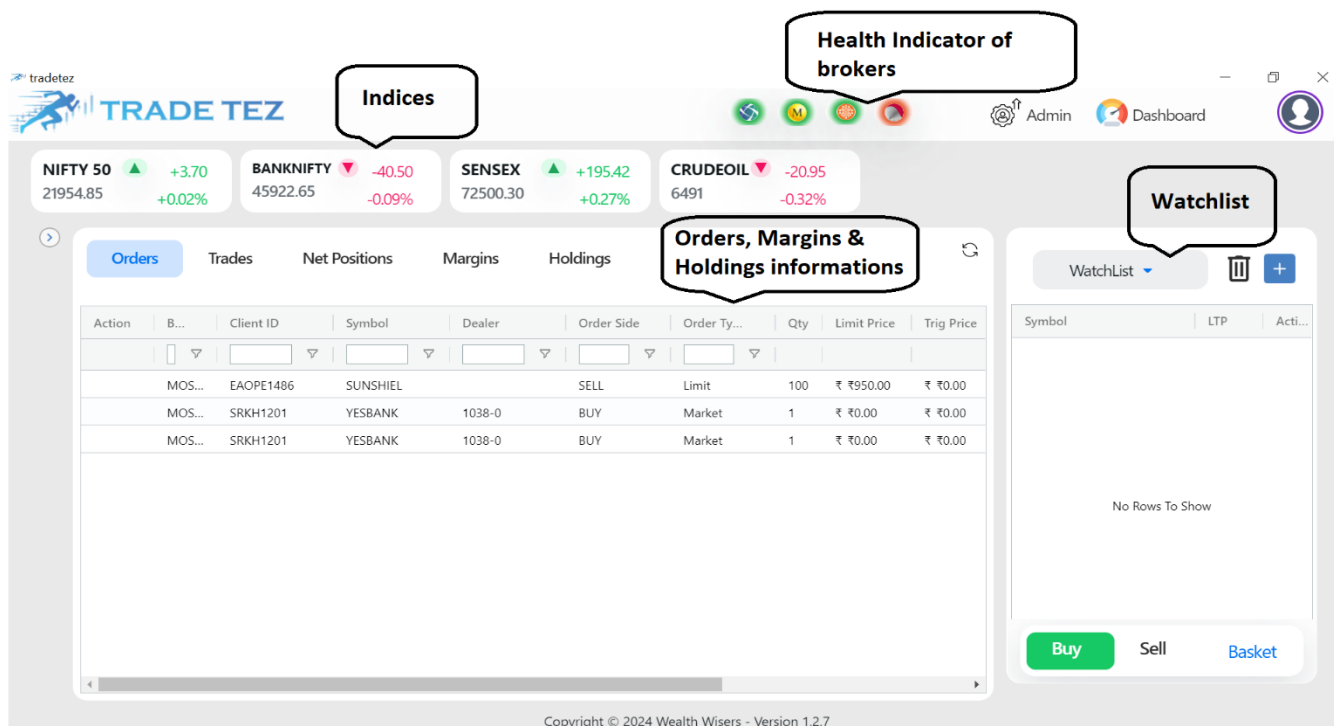

The Broker Health section displays vital information regarding your brokerage account's health.

2. Market Indices Prices

In this section, you can view the latest market indices prices along with their respective changes compared to the previous trading session. Stay informed about market trends and fluctuations in real-time.

3. Account Information

Access essential account details such as account balance, equity, buying power, and any outstanding obligations. Keep track of your financial position and make informed trading decisions accordingly.

A.) Orders:

Monitor all your placed orders in one convenient location. Track order status, including pending, executed, and canceled orders. Gain insights into your trading activities and manage orders efficiently.

B.) Trades:

Review your recent trades and transaction history. Get detailed information about executed trades, including trade date, time, instrument traded, quantity, price, and total value. Analyze your trading performance and identify patterns for future decision-making.

C.) Net Positions:

The Net Positions section displays your current trading positions across various securities and asset classes, allowing you to monitor, square off positions, and track Mark-to-Market (MTM), realized, and unrealized data.

D.) Margins:

The Margin section provides a comprehensive overview of your trading account's margin-related information, including available cash, collateral, margin utilized, and net margins. It enables you to track your brokerage margin, assess cash availability, monitor collateral values, review margin utilization, and analyze net margin positions for informed trading decisions.

E.) Holdings:

The Holdings section presents a detailed overview of your portfolio holdings, including profit and loss (P&L) data and percentage of P&L for each holding. It allows you to track the performance of your investments, analyze gains or losses, and assess the percentage change in value relative to the initial investment. With comprehensive P&L information, you can make informed decisions regarding portfolio management and asset allocation strategies.

5. Watchlist:

The Watchlist feature in TradeAI empowers you to add stocks, futures, and options for quick access and streamlined trading. With just one click, you can execute trades on securities within your Watchlist, facilitating efficient decision-making. Additionally, the dashboard displays real-time changes exclusively for the stocks and derivatives listed in your Watchlist, ensuring focused monitoring and informed investment actions.

Future & Option Screen

Future & Option Screen :

A versatile trading interface designed for seamless futures and options transactions. The screen displays a comprehensive table of available options, allowing users to review and select specific contracts easily. With the multi-account trading feature, users can execute trades across several accounts in one step, optimizing efficiency and flexibility for high-frequency trading and portfolio management.

The screenshot displays the TradeAI1 trading platform interface for the 'FUTURE & OPTION' section. The top navigation bar includes the TradeAI1 logo, navigation icons, and links to CLI, Admin, Dashboard, Webhook, Help, and a user profile. The main header shows 'FUTURE & OPTION' with tabs for 'Equity', 'F&O', and 'Basket'. Below this, there are search fields for 'Select Symbol' and 'Select Clients', along with a '+ Add' button. A table lists various trading parameters: Broker, Client ID, Quantity, Total Quantity, Margin, Required Margin, Status, and Actions. The 'Option Chain' section is active, showing a table with columns for OI, Call LTP, Strikes, Put LTP, and OI. The selected index is 'NIFTY' and the expiry date is '14-Nov-2024 (NSE)'. The current LTP is 23576.50. The option chain table shows various strikes and their corresponding LTPs. On the right, the 'Last 5 Bid/Ask History' for NIFTY 14 NOV 2024 CE 23600.00 LTP: 24.90 is displayed, showing bid and ask prices and quantities. Below this, the 'Lot Size : 25, LTP: 24.90' is shown. The 'Order Side' section includes radio buttons for 'Buy' and 'Sell', and the 'Type' section includes radio buttons for 'MKT', 'LIMIT', and 'SL'. The 'Product' section includes radio buttons for 'NORMAL' and 'INTRADAY'. At the bottom, there are input fields for 'Limit Price' and 'Trigger Price', both set to 0.00. The footer shows the copyright notice: 'Copyright © 2024 Wealthwisers Technologies Pvt. Ltd - Version 2.0.15' and the system status: 'ENG 10:47 AM'.

F&O Basket

The F&O (Futures and Options) basket allows traders to execute multiple derivative contracts as a single trade. By grouping multiple futures or options in a single "basket," traders can diversify risk and execute complex strategies efficiently. To trade an F&O basket, select your desired contracts (like calls, puts, or futures), set their quantities, and place them together in one order. This method can be helpful for hedging, speculation, or arbitrage strategies while managing exposure across different instruments. Always review margin requirements and risk factors when trading F&O baskets.
